

FOOD ON DEMAND

There is so much to consider when choosing your carryout food packaging. With customers now demanding higher quality and environmentally friendly options, more careful consideration should be taken. Graphic Packaging International has a wide range of products to help you make the right choices in serving your customers. Check out the benefits of Graphic Packaging International fiber-based food packaging!

No Mess! Our containers have multiple lid options designed to be stackable AND create a tighter seal, making sauce leaks on the ride home a thing of the past! Strength and sturdiness support heavier food and the raised bottom surface protects your hand from heat transfer.

Space Saving! Eating at your desk can sometimes be a juggling act. The lid of a clamshell container takes up space and gets in the way of your multi-tasking. Not a problem with our 2 piece options!

Custom Prints!

We offer a way to customize your containers with your brand. Adding your logo or colorful design to your takeout containers is a great way to advertise your business.

Environmentally Friendly!

Made from sustainably managed forests, our products offer a solution to the customer demand for eco friendly products. Compostable options also available!

Versatility!

No matter what your food selection is, we have a solution for you. We have many sizes to choose from as well as multiple lid options for different food applications including hot and cold. Here is just a sample of the types of food our containers can hold.
