

Clamshells are ideal foodservice packaging solutions for consumers who are eating on the go, picking up or getting delivery. Clamshells have a hinged lid with built-in locks to keep items enclosed. This product line can come in a variety of shapes and sizes, with the option to add a window on some sizes for visibility. The one-piece package design allows the clamshells to be stacked and is perfect for operators looking for a single item with a built-in lid to reduce SKUs. They help maintain freshness for hot or cold items like sandwiches, sides, hot dogs, and single slices of pizza.

Sustainability

- Hinged top allows you to trade your plastic clamshell or 2-piece container for a single, all-paperboard package to reduce plastic usage
- Sustainable alternative to plastic or foam
- Fiber used meets the Sustainable Forestry Initiative® (SFI®) Certified Sourcing standards, ensuring that it comes from responsibly managed sources

Operational Efficiency

- Stackable to save counter and back-of-house storage space
- Built-in lid on clamshells reduces SKUs by eliminating a lid and allows employees to easily fill the package when preparing food
- Made in the USA, allowing for supply chain security and efficiency

Consumer Experience

- Plain white color to promote a minimalist look and allow your brand to stand out
- Durable structure holds up when carrying, eating and placed on a tray
- Helps to keep food intact, allowing consumers to enjoy their meal as intended
